

El Dorado, Tharang2020

Non-technical Event

The event – El Dorado – for the tech fest, Tharang 2020 is a treasure hunt where the participants are given clues and solving it leads to the final prize. Instead of the traditional go-to-a-place and find-a-clue model, we intend to digitalize the whole process, thus by giving all or most of the clues online or via a mobile application. The event is a non-technical one, so to attract as many contestants as possible, ensuring maximum participation.

Event Model:

1. After the successful registration of each team, the mobile application developed is shared with the participants and the first clue is given.
2. The mobile application contains features such as :
 - a) Code Scanners.
 - b) Maps of each and every floors of the campus.
 - c) Real time status of each teams.
 - d) Methods to give clues at various levels, etc.
3. The computer labs, or laptops can be used to give the clues at various locations.
4. Multiple types of codes are given at various part of the campus to solve the clues.
5. The teams can make use of these codes and clues at various locations to proceed further on the hunt.
6. The difficulty of the clues increases as the game goes on.
7. At the end of the game, if there comes a situation of a tie, a quick match will be conducted to finalize the winner.

Requirements for the participants :

1. The mobile application need to be installed on the participants phones.
2. Android mobile phones for atleast one member in a team.

Budget :

The main cost of the events will only consist of the prize money.

Requirements from College :

1. Permission to use our computer lab for giving the clues on some levels.
2. Screen to display the real time scores and status of each teams.
This could increase the gaming mentality of the teams.
